EXPERIENCE

CarDekho

Gurgaon

Software Engineer

Dec 2022 – Present

- Spearheaded API performance optimization, decreasing response time from 2s to 400ms for 40K+ users through GraphQL and Redis implementation
- Architected enterprise-wide RBAC system enhancing security for 40K+ users across 12+ departments with granular access control
- Orchestrated real-time analytics platform, elevating user goal completion from baseline to 30% through continuous performance tracking
- Engineered PDF microservice processing 13,700+ monthly documents, optimizing generation speed from 15s to 5s
- Transformed dealership operations from 3-hour manual process to 5-minute digital workflow through custom automation system

Mindtree

Bengaluru

Engineer

Dec 2021 – Dec 2022

- Implemented regression testing framework, cutting cycle time from 2 weeks to 3 days using POM architecture and CI/CD pipeline with Jenkins integration
- Strengthened API reliability, decreasing daily error incidents from 5K to 100 through enhanced validation and comprehensive error logging system
- Executed comprehensive security audit, eliminating 47 critical vulnerabilities across core systems
- Led 20-person intern cohort, achieving 80% conversion rate through structured technical curriculum

KloudGin

Hyderabad

Trainee Engineer

Sep 2020 – Mar 2021

- Optimized map rendering efficiency, decreasing load time from 5s to 1s for 10K+ users through advanced caching
- Developed automated dashboard system, slashing creation time from 48h to 2h through template workflows
- Enhanced grid performance for 1M+ records with adaptive data loading and row-level caching

PROJECTS

Journey | Node.js, Express, React, MySQL, MongoDB

- Designed scalable evaluation platform managing 30K+ agents and 5K+ managers across hierarchical structures
- Established parallel processing workflow, shortening evaluation cycles from 15 days to 3 days
- Created automated reporting system, improving compilation efficiency from 48h to 30 min

Notification Module | Node.js, React, GCP

- Boosted system engagement from 45% to 85% through intelligent notification targeting
- Achieved 99.9% notification reliability with millisecond latency using GCP Pub/Sub architecture
- Implemented matrix-based targeting supporting 56 unique business-role combinations

TECHNICAL SKILLS

Core: JavaScript (ES6+), TypeScript, Python, Java, SQL

Frontend: React, Angular, HTML5/CSS3, Tailwind CSS

Backend: Node.js, Express.js, NestJS, GraphQL, Microservices Architecture, RESTful APIs

Cloud & DevOps: AWS, GCP, Docker, Git, JIRA

Databases: MongoDB, MySQL, Redis

EDUCATION

Chandigarh University

Punjab, India

Bachelor of Engineering in Computer Science

Aug 2017 – May 2021

- Core Coursework: Data Structures, Algorithms, Database Management, Web Development
