

SUMMARY

- Full Stack Developer with 3.4 years of experience in developing scalable web applications
- Expertise in JavaScript/TypeScript ecosystem with focus on Node.js and React
- Track record of delivering high-impact features improving system efficiency by 25-75%

FUNCTIONAL AREAS

- Full Stack Development
- System Architecture
- Performance Optimization
- API Development
- Database Design
- Technical Leadership

TECHNICAL SKILLS

- **Languages:** JavaScript (ES6+), TypeScript, Python, Java, C/C++, SQL
- **Frontend:** React, Angular, HTML5, CSS3, SCSS, Tailwind, Bootstrap
- **Backend:** Node.js, Express.js, NestJS, Django, GraphQL
- **Databases:** MongoDB, MySQL, PostgreSQL, Redis
- **Cloud & DevOps:** AWS (EC2, S3, QuickSight), GCP (Pub/Sub, Cloud Scheduler), Jenkins
- **Testing:** Jest, Selenium, JUnit
- **Tools & Methodologies:** Git, JIRA, RESTful APIs, GraphQL, Microservices, Agile/Scrum, TDD

PROFESSIONAL EXPERIENCE

- **CarDekho, Gurgaon** **Dec 2022 – Present**
Software Engineer
 - Architected NestJS/GraphQL features with efficient data modeling, improving retrieval speed by 25% for 200+ daily users
 - Engineered role-based access system with custom middleware, reducing unauthorized access by 75% across modules
 - Orchestrated performance tracking system integrating CSV uploads and real-time visualization, boosting goal attainment by 30%
 - Developed scalable PDF microservice with dynamic templates, reducing generation time to 5 seconds for 13,700+ reports
 - Crafted mobile-responsive dealership form system with instant acknowledgment, cutting completion time to 4-5 minutes
- **Mindtree, Bengaluru** **Dec 2021 – Dec 2022**
Engineer
 - Spearheaded test automation framework with parallel execution capabilities, achieving 61% automation and 48% faster cycles
 - Optimized RESTful APIs with comprehensive error handling, improving functionality by 59% across client integrations
 - Established security protocols using vulnerability scanners, mitigating 97% of common security threats
 - Mentored 20-intern full-stack development program covering Node.js ecosystem, achieving 80% conversion rate
- **KloudGin, Hyderabad** **Sep 2020 – Mar 2021**
Trainee Engineer
 - Integrated ArcGIS features with custom map controls, delivering 39% faster visualization for 10,000+ daily users
 - Designed Java-based AWS QuickSight automation tool, streamlining report generation workflow by 46%
 - Refined agGrid implementation with advanced features, accelerating data loading by 27% for 1M+ records

KEY PROJECTS

- **Journey** | *Node.js, Express, React, MySQL, MongoDB*
 - Architected multi-tier evaluation system with configurable performance metrics for 40,000+ financial agents
 - Designed hierarchical approval workflow with automated validation, reducing evaluation time by 80%
 - Streamlined final approval process with real-time updates, cutting processing time by 95%
- **Notification Module** | *Node.js, React, Google Pub/Sub, Cloud Scheduler*
 - Constructed flexible notification system with customizable parameters, enhancing user engagement by 37%
 - Established precise targeting mechanism with CSV uploads, enabling communication across 50+ user segments
 - Leveraged Google Pub/Sub for efficient message processing, achieving 97% delivery within 3 minutes

EDUCATION

- **Chandigarh University** **Punjab, India**
- Bachelor of Engineering in Computer Science *Aug 2017 – May 2021*
